Subject: RE: Freedom of Information Act Request FI-00145

Thank you again Deanna for all your help and assistance in connection with our request referenced below. We truly appreciate you providing such diligent service. The information you provided was most helpful in answering the questions we asked, and therefore, we need no further action on our request. Should we need any further information, we will submit a new request.

Best Regards,
Remy

Subject: Freedom of Information Act Request FI-00145

Mr. Remy Donnelly

Dear Mr. Donnelly:

FREEDOM OF INFORMATION ACT REQUEST NO. FI-00145

This is in response to your October 13, 2009 Freedom of Information Act e-mail request where you are seeking copies of records pertaining to the Department of Energy, Strategic Petroleum Reserve's flooding of the salt dome located in Weeks Island, Louisiana. Specifically, you were interested in any information concerning the costs of the flooding project as well as any information or analyses regarding the flooding of the salt dome versus fresh water.

A search was conducted for any and all available records related to your specific request and the following is the result of the search and review of retrieved documents.

Attached is an electronic final report from the Sandia National Laboratories, Underground Storage Technology Department documenting the 1999 decommissioning and abandonment activities at the Weeks Island Strategic Petroleum Reserve site, Iberia Parish, LA.

Please call me for additional information or have any questions concerning this request please call (504) 734-4316.
